

Installation

The installation is accomplished in the reverse order of removal observing the following points:

1. Check the plastic strip under the moulding. If replacement is necessary, proceed as in 7 B O and cut excess material from the inside of the curved portion at either end of the bumper.
2. Install the plastic strips correctly under the bumper guards.
3. Install the bumper guards and braces before securing the braces to the car.
4. Loosely install all bumper mounting screws before tightening.
